

Legislative Interim Committee
of Federal Lands

Chairman Senator Chuck Winder & Representative Lawrence Denney and Committee members

Due to the feds. Control of Idaho lands and the lock up of our forest “ the great Church Wilderness”, this is pulling our economy down in a sinkhole.

We need our state to manage these lands for growth and being better able to manage wildfires and health of the forest. I have seen over and over where the state manages lands they are so much more productive. By allowing logging, grazing & recreation. The wildlife prospers better. This would allow small contractor as myself to have much more work and be able to hire more people to help grow Idaho's economy.

Just a much better way to help our state, county governments & schools to be self-supporting and not have to be wards of the federal government.

So taking back our federal lands would only be for the betterment and pride of our people of Idaho.
